

Dr. Parinaz Salehi, Assistant Professor of Dental Materials at Isfahan University of Medical Sciences, got her Ph.D. in Materials Engineering under supervision of Profs. Keyvan Raeissi and Fathallah Karimzadeh in March ۲۰۱۹. Since September ۲۰۱۹, She spent ۱۰ months as a visiting student at the Department of Engineering of University of Messina in Sicily, Italy. During this period she investigated “Erosion-Corrosion Behavior of Superhydrophobic Nickel-based Electrodeposits” under supervision of Profs. Edoardo Proverbio and Luigie Calabrese followed by full support of Prof. Keyvan Raeissi. Moreover, her time was packed with learning, research opportunities and exceptional experiences of friendship with international students at the dormitory. The results of her scientific collaborations were published in several ISI papers [۱].
